### Objective:

The objective of this workshop is to learn the Skill of making pottery. To comprehend material characteristics of Mud or clay. To demonstrate a beginning level of understanding of ideas, to explore the materials and techniques.

### Learning outcome:

The ability to design forms with clay understanding of space and form created by various methods. Ability to appreciate or critique textural quality of clay.

### Activities held:

**Pinching technique:** The process begins with a ball of clay. Thumbs are pushed into the center, and then rudimentary walls are created by pinching and turning the pot. The pot is then pushed on a flat surface to create a flat surface, thereby creating the base.

**Coiling technique:** Clay is rolled until it forms a coil, or long pliable cylinder. By placing one coil on top of another, different shapes can be formed.

**Slab technique:** Smooth slabs of clay that are formed around moulds or shaped and cut by hand. The slabs are then layered. This technique is used to make more angular shapes that can't be created on a wheel.
