

Faculty Of Engineering
Department of Electronics & Communication Engineering

REPORT ON DEPARTMENT EVENTS

Academic year & Semester	2020-21, ODD	
Name of the Department	ECE	
PoC Faculty Member for clarifications (write email ID & mobile number for contact)	Prof. Delson T R delson.tr@christuniversity.in 7760327703	
Details of the Event		
Name of Event	Webinar	
Description of the Event (seminar/workshop/guest lecture/hands on practice/Industrial Visit)	Webinar – Mobile robotics from path planning to control	
Address & contact details of Resource Persons/Speakers if any (provide email ID & mobile number of all the speakers)	Dr. Robins Mathew, Post-Doc Research Fellow, University College, Durban	
No. of Days event held	One	
Date(s) and Duration	Date: 15 AUG 2020	Time: 3:00 pm
Any amount spent for the event ?	Nil	
Details of participants attended the event		
Number of guests from outside university	Nil	
Students & faculty members from the department	171	
Students & faculty members from Faculty of Engineering (other depts.)	-	
Total Participants	171	
Is Attendance list enclosed? If no, specify the reason	YES

Report on Webinar conducted 2020-21

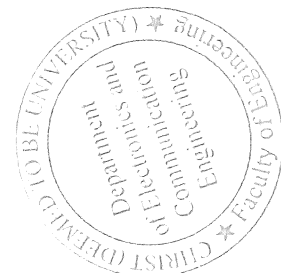

2. Webinar - "Mobile robotics from path planning to control"

PRESENTED BY

**Dr. Robins Mathew
Post-Doc Research Fellow
University College, Durban**

15-08-2020 (3:00 P.M.)

Dr. Robins Mathew webinar talk focus on Mobile robotics from planning to control. Robotic is now gaining a lot of space in our daily life and in several areas in modern industry automation and cyber-physical applications. This requires embedding intelligence into these robots for ensuring (near)-optimal solutions to task execution. Thus, a lot of research problems that pertain to robotic applications have arisen such as planning (path, motion, and mission), task allocation problems, navigation, tracking. Moving from one place to another is a trivial task, for humans. One decides how to move in a split second. For a robot, such an elementary and basic task is a major challenge. In autonomous robotics, path planning is a central problem in robotics. The typical problem is to find a path for a robot, whether it is a vacuum cleaning robot, a robotic arm, or a magically flying object, from a starting position to a goal position safely. The problem consists in finding a path from a start position to a target position. This problem was addressed in multiple ways in the literature depending on the environment model, the type of robots, the nature of the application, etc. Safe and effective mobile robot navigation needs an efficient path planning algorithm since the quality of the generated path affects enormously the robotic application. Typically, the minimization of the traveled distance is the principal objective of the navigation process as it influences the other metrics such as the processing time and the energy consumption. The talk was well received by students and faculty members in the department.

CHRIST

BANGALORE - INDIA

**School of Engineering and Technology
Department of Electronics and Communication
Engineering**

presents

Webinar Series on " Core Technologies Xplored "

**Mobile Robotics from
Path Planning to Control**

Dr. Robins Mathew

Post-Doctoral Research Fellow
University College Dublin,
Ireland

15 August 2020, 3:00 P. M.

**Advancement in Embedded
Systems: Era of IoT and AI**

Mr. Vysakh P. Pillai

Principal Engineer
Microchip Technology,
Bengaluru

22 August 2020, 6:00 P. M.
