Workshop based on skill development: Data Visualization through *Tableau*

Date - 10/01/2021-25/01/2021

Online Mode

Data Analytics and Visualization using Tableau

Course Overview

- Tableau is the leading, interactive, secure and flexible data visualization tool
- This comprehensive and practical course helps participants to build fundamental skills to visualize and analyze data to uncover insights for business decisions making
- Participants will learn techniques of data management, use of calculations and learn to create informative, appealing and interactive dashboards

Session Highlights

- Tableau certified Instructors
- Instructors with industry, teaching and training experience for more than 20 years
- Practical and hands own learning
- Use of real time driven story telling sessions
- Practical assignments and project work

Course Syllabus

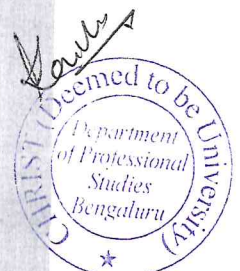

- Introduction to Data Science
- Getting started with Tableau
- Connecting to Data Sources and Tableau User Interface
- Visualizing data, basic charts and graphs, saving visuals
- Data aggregation and level of detail
- Understanding Date data type
- Types of calculations
- Working with data and connection
- Data organization and problem solving using visual analytics
- Maps and Geographic roles
- Creating interactive Dashboards and actions

30 hours duration

Start Date: <<dd/mm/yyyy>>

The concept of the citizen data scientist is on the rise. Skill sets are changing to accommodate a data-driven world. It is increasingly valuable for professionals to be able to use data to make decisions and use visuals to tell stories of when data informs the who, what, when, where, and how. While traditional education typically draws a distinct line between creative storytelling and technical analysis, the modern professional world also values those who can cross between the two: data visualization sits right in the middle of analysis and visual storytelling.

In this world of Big Data, data visualization tools and technologies are essential to analyze massive amounts of information and make data-driven decisions. This workshop conducted for 89 students from BCOM IF, BCOM P and BBA FA helped students to tell stories by curating data into a form easier to understand, highlighting the trends and outliers.
