Web Conferences are synchronous meetings in a virtual environment. They are usually centered around a website where visual and text content is displayed, and include audio and sometimes video.

Online Forums (also called bulletin boards, discussion groups, or news groups) allow learners to interact with each other and the instructor through threaded discussions by posting messages on specific subject areas, starting new threads and sub-threads, or posting replies to others.

Electronic Mailing Lists (also called listservs) allow members to send messages to other members of the same mailing list.
